PROFESSIONAL SUMMARY

Data Analyst with 3+ years of operational experience in data processing, reporting automation, and business intelligence at Enterprise Holdings (Alamo, Enterprise, National) at Juan Santamaría International Airport (SJO). Built Python and SQL solutions that process 500+ daily reservations, eliminating 10+ hours of manual work per week and cutting report generation time from 2 hours to 15 minutes. Experienced in low-code automation (n8n), open-source BI (Metabase), and database management (DuckDB, SQLite). Skilled in data cleaning, exploratory data analysis, KPI tracking, and dashboard design (Power BI, Metabase, Excel). Bilingual (English/Spanish) with Data Analytics certifications from Cisco and Google, currently completing a Bachelor's degree in Marketing at Universidad San Marcos.

TECHNICAL SKILLS

Category	Skills
Programming & Querying	Python (pandas, numpy, matplotlib, openpyxl, scikit-learn), SQL (joins, subqueries, CTEs, aggregations, window functions), VBA
BI & Visualization	Power BI (DAX, Power Query), Metabase, Tableau, Excel (PivotTables, Dashboards), Matplotlib
Data Analysis	Data Cleaning, Exploratory Data Analysis (EDA), KPI Tracking, Business Metrics, Statistical Analysis, Feature Engineering
Automation & ETL	n8n (low-code automation), Python Scripting, VBA Macros, Workflow

Category	Skills
	Optimization, Automated Reporting Pipelines
Databases	MySQL, MariaDB, DuckDB, SQLite, H2
Tools & Platforms	Git/GitHub, Docker, Google Workspace, Microsoft Office Suite
Languages	Spanish (Native), English (Advanced/Bilingual â€” daily use with international clients)

WORK EXPERIENCE

Rental Agent & Data Analyst

ANC Rent a Car (Alamo / Enterprise / National) â€” SJO Airport, Costa Rica
Sep 2024 â€” Present

- Developed Python scripts (pandas, openpyxl) to process 500+ daily reservation manifests, generating automated Game Plan, No-Show, and executive summary reports â€” eliminating 10+ hours of manual work per week
- Automated Excel dashboards with PivotTables and multi-brand segmentation, reducing report generation time from 2 hours to 15 minutes
- Implemented VBA macros for multi-sheet file processing and format standardization, achieving 100% consistency in daily operational reports
- Designed and managed a SQL database for structured reservation tracking, enabling agile queries and historical traceability
- Analyzed daily operational data to identify no-show patterns, booking trends, and seasonality, supporting inventory management decisions
- Designed interactive Power BI dashboard with DAX measures, No-Show KPIs, revenue tracking, and hourly/daily trends â€” used by management for daily decision-making
- Built ETL pipelines (Python + n8n) that automate data extraction from reservation manifests, transformation, and loading into databases and BI tools
- Served international clients in English, maintaining customer satisfaction KPIs above 95%

Sales and Service Advisor

Café Britt SJO Airport, Costa Rica

Oct 2023 – Mar 2024

- Analyzed international customer purchasing behavior to identify up-selling and cross-selling opportunities, increasing average ticket during peak season
- Delivered personalized service to domestic and international clients in English and Spanish

Call Center Agent

Grupo Dokka Heredia, Costa Rica

Mar 2022 – Sep 2023

- Tracked and analyzed contact and sales metrics via CRM system, identifying conversion patterns by time slot
- Managed high-volume inbound and outbound calls, consistently meeting daily KPI targets for handling time, conversion rate, and satisfaction
- Documented customer interactions accurately in CRM database for quality assurance and reporting

PORTFOLIO & PROJECTS

n8n Data Analyst Automations (NEW)

github.com/JoseAn03/n8n-data-analyst-automations Low-code automation workflows for data analysts using n8n. Includes daily email reporting, KPI alerts, scheduled ETL, Google Sheets ↔ SQL sync, web scraping, and file analysis – all connecting to DuckDB and integrated with Metabase dashboards. Demonstrates automated data pipeline orchestration without manual scripting.

Metabase Analytics Portfolio (NEW)

github.com/JoseAn03/metabase-analytics-portfolio Open-source BI dashboards built with Metabase as a free alternative to Power BI. Includes DuckDB/SQLite database with real SJO airport reservation data, 7+ interactive visualizations (KPIs, bar charts, pie charts, pivot tables), complete Docker Compose stack (n8n + MySQL + Metabase), and SQL query library for business analysis.

Power BI Rental Dashboard

github.com/JoseAn03/powerbi-rental-dashboard 4-page interactive Power BI dashboard with 30+ DAX measures tracking 4,600+ reservations, no-show rates,

revenue by brand, and hourly/daily trends. Star Schema data model with fact and dimension tables. Live preview available.

GamePlan Automation

github.com/JoseAn03/Proyectos- Python and VBA solution processing 500+ daily reservations into a formatted 3-tab Excel workbook segmented by brand (Alamo, Enterprise, National). Automated report generation with executive summaries.

No-Show Prediction ML

github.com/JoseAn03/ml-noshow-prediction Machine Learning model using Random Forest (scikit-learn) with 11 features to predict no-show probability per reservation. Includes feature engineering, ROC AUC evaluation, and confusion matrix analysis.

SQL Decision Intelligence

github.com/JoseAn03/sql-decision-intelligence 4-level progressive SQL portfolio with real SJO airport data: basic queries, CTEs and subqueries, window functions with RANK and LAG, query optimization with EXPLAIN analysis.

Weather Data Pipeline

github.com/JoseAn03/weather-data-pipeline ETL pipeline that fetches weather data from Open-Meteo API, processes it with Python, and visualizes trends. Demonstrates API integration and automated data collection.

CERTIFICATIONS

Certification	Issuer	Date
Data Analytics Essentials	Cisco Networking Academy	May 2026
Data Science Essentials with Python	Cisco Networking Academy	May 2026
Introduction to Data Science	Cisco Networking Academy	Jun 2026
Foundations: Data, Data, Everywhere	Google / Coursera	May 2026
Process Data from Dirty to Clean	Google / Coursera	Jun 2026
Ethical Hacker	Cisco / INA	May 2026
Introduction to Cybersecurity	Cisco / INA	Nov 2025
Networking Basics	Cisco / INA	Jun 2025

EDUCATION

Degree	Institution	Status
Bachelor’s Degree in Marketing	Universidad San Marcos (USAM) San Jos�, Costa Rica	In Progress
Executive Technician in Customer Service Information Technology Operator	INA	2025
High School Diploma	INA	2020
	Colegio Rodrigo Hern�ndez Vargas	2019

KEY ACHIEVEMENTS

- 87.5% **time reduction** in report generation (2 hours to 15 minutes)
- 3% **No-Show rate reduction** through data-driven operational insights
- 500+ **daily reservations** processed automatically through Python + n8n pipelines
- 7+ **interactive dashboards** created across Power BI, Metabase, and Excel
- 4,600+ **reservations** in analytical database with SQL traceability
- **Bilingual** daily English communication with international clients
